

REMARKS

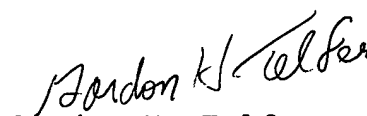

Examination is requested of all of claims 1-47 as now presented.

The new claims 33 to 47 are believed all clearly supported by the disclosure of the parent application. While allowed claims of the parent application were drawn as they are to expedite allowance of that application, applicants are believed clearly entitled to claims such as those now presented.

In the prosecution of the parent application, applicants particularly pointed out reasons the purported showing of obviousness of the rejected claims in that application was inadequate. These reasons are firmly considered to apply as well to any such rejection of claims 33 to 47. Also, claims 33 to 47 are drawn with clarifying language intended to aid in recognition of their contrasts with the prior art.

Applicants urge entry of this amendment followed by prompt examination and allowance of the application.

Respectfully submitted,

Gordon H. Telfer  
Attorney for Applicant(s)
